

Final Conference & National Multiplier Events News

www.sparkling-grey.eu

In order to reach the target groups to which the project is addressed, **five Multiplier Events** took place in France, Austria, Spain, Hungary and Portugal to disseminate the project products at a national level.

During these events, the projects' aims and objectives, results and activities - as well as the EU contribution and support - were presented. For one day participants, especially from the metal and textile sector but not exclusively, were involved in co-design and brainstorming sessions.

The six events were a tremendous success, with great feedback from participants and revealing that these 3 years of project and its products were of great value not only to the textile and metal sectors, but to all organisations that intend to manage and stimulate an effective multi-generational workforce.

In total, the Multiplier events counted with 127 participants, mainly HR managers, business managers and trainers/consultants/career guidance, besides the presence of representatives of public and private labour organizations, senior and retired employees.

A **Final conference**, composed by different 3 events, took also place in Valencia (organized by FyG in cooperation with other organizations such as FEMEVAL – the Valencian Federation of Metal and AJEV – Valencian Association of Young Entrepreneurs), with a total of 66 national participants covering the same spectrum of target groups.
